

Problem - Solution Fit Template

DATE	22JUN 2025
TEAM ID	LTVIP2025TMID57110
PROJECT NAME	HOUSEHUNT-FINDING YOUR PERFECT RENTAL HOME

1. Problem Statement

- Problem 1: Difficulty in Finding Rental Properties

Many potential renters struggle to find suitable rental properties that meet their specific needs (e.g., location, price, amenities).

- Problem 2: Inefficient Communication Between Renters and Property Owners

Communication between renters and property owners can be slow and inefficient, leading to missed opportunities and frustration.

- Problem 3: Lack of Transparency in Rental Processes

Renters often face a lack of transparency regarding rental terms, property conditions, and the overall rental process, which can lead to distrust.

- Problem 4: Management of Bookings and Appointments

Property owners often find it challenging to manage bookings and appointments efficiently, leading to double bookings or missed opportunities.

2. Target Audience

- Renters: Individuals or families looking for rental properties.
- Property Owners: Individuals or companies that own rental properties and want to list them for rent.
- Real Estate Agents: Professionals who assist clients in finding rental properties.

3. Proposed Solutions

- Solution 1: Comprehensive Property Search Functionality

The application provides a user-friendly interface for renters to search for properties based on various criteria (e.g., location, price range, number of bedrooms).

Feature: Advanced filtering options to narrow down search results.

Benefit: Helps renters quickly find properties that meet their specific needs.

- **Solution 2: Integrated Communication Tools**

The application includes built-in messaging features that allow renters and property owners to communicate directly within the platform.

Feature: Real-time chat and notification system.

Benefit: Facilitates faster communication, reducing the time taken to finalize rental agreements.

- **Solution 3: Transparent Rental Process**

The application provides detailed information about each property, including rental terms, conditions, and any additional fees.

Feature: Clear display of property details and rental agreements.

Benefit: Increases trust and transparency between renters and property owners.

- **Solution 4: Booking Management System**

The application includes a booking management system that allows property owners to manage appointments and bookings efficiently.

Feature: Calendar integration and booking notifications.

Benefit: Reduces the likelihood of double bookings and ensures that property owners can maximize their rental opportunities.

4. Unique Value Proposition

The House Hunt project combines a comprehensive property search engine with integrated communication tools and transparent rental processes, creating a seamless experience for both renters and property owners. By addressing the key pain points in the rental market, the application aims to simplify the rental process and enhance user satisfaction.

5. Key Metrics for Success

- **User Engagement:** Number of active users (renters and property owners) on the platform.
- **Conversion Rate:** Percentage of users who successfully complete a rental transaction through the application.
- **User Satisfaction:** Feedback and ratings from users regarding their experience with the platform.

- Property Listings: Number of properties listed on the platform and the frequency of new listings.

Conclusion

This Problem-Solution Fit Template outlines the key challenges faced by your target audience and how your House Hunt project addresses these challenges through innovative solutions. By clearly defining the problems and corresponding solutions, you can effectively communicate the value of your project to stakeholders and potential users.
